Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Election/Restrictions

2. Applicant's election without traverse of claims 15-28 and cancellation of non-elected claims 1-14 in Paper filed on 08/19/03 is acknowledged.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 15-28 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The claims require performing cleaning of film deposition equipment comprising a reactor in a state where no wafers are received within the reactor. At the same time the claims require spraying a mixture of a cleaning gas and an inert gas onto the wafer. It is noted that the specification requires the same. See page 2, lines 19-29. The claimed process could not be performed. An ordinary artisan would not be able to spray a gas onto the wafer, which is not presented.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US Patent 5,988,187 is cited to show the state of the prior art with respect to cleaning deposition equipment. US Patent 6,573,184 is made of the record. This patent is issued to the applicant and claims a process, which comprises spraying different gasses in ALD thin film deposition equipment.
